

# Potato Peeler with Stand

## Potato Peeler with Stand

### Model PPF/10—PPF/18

EFFICIENT OPERATION FOR EFFICIENT CLEANING. Every component of these peelers has been optimized to conform with the most rigorous principles of hygiene and safety. The use of magnetic micro-switches makes them particularly safe to operate. Noise emission less than 70 decibels. CE certificate.

Made throughout in 18/10 stainless steel to guarantee hygiene and robustness. Constant input of water during operating phase permits constant product washing that ensures excellent peeling of contents, which are ready for use immediately at the end of each operating cycle. Disk allows products to be cleaned perfectly, simulating manual processing, while disk has an abrasive peeling action that guarantees low wastes from peeled products. Disk can be extracted by hand, with no need for special tools. The lid in non-toxic pressed plastic is transparent, allowing operations to be observed at all stages.

### Technical Characteristics

- ◆ “Poly v” drive belt. Disk rotation shaft in stainless steel supported by watertight bearings and double sealing ring.
- ◆ The peeler drum is totally accessible (snap-on lid support ring) for loading and final cleaning.
- ◆ The ergonomic handle makes the front emptying hatch easier to open and close.

### Technical Information

Model	PPF/10	PPF/18	PPF/25
Max. potato load:	10kg	18kg	25kg
Speed:	350rpm	350rpm	350rpm
Power:	0.75 kW	1.1 kW	1.1kW
Voltage:	230V	230V	230V
Weight:	40kg	42kg	88kg
Outside dimensions: (including stand)	430x670x1140 (WxDxH mm)	430x670x1230 (WxDxH mm)	540x900x1350 (WxDxH mm)
